Motivation

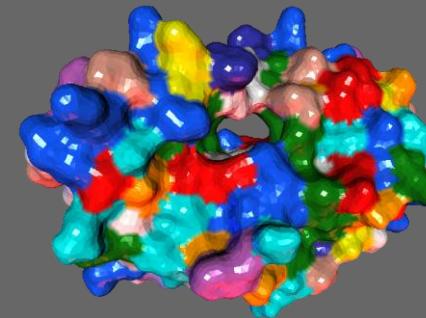

Surfaces

- highly detailed meshes

Scanned meshes

- manufacturing
- entertainment
- science

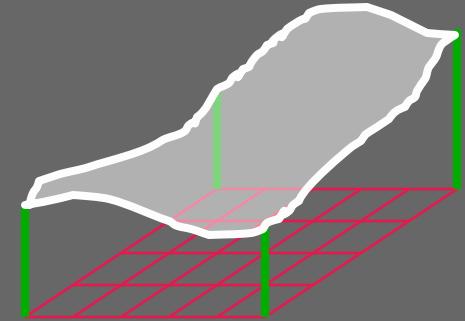

Efficient and compact representation

Surfaces

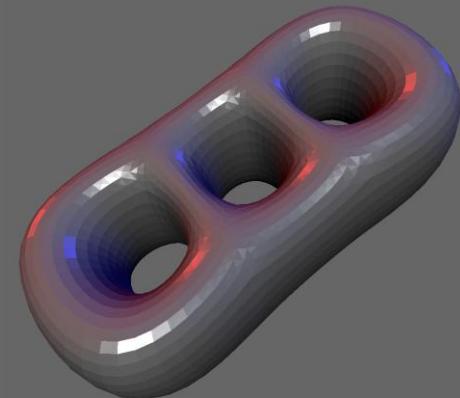

Height fields, terrains

- $f(u,v)$
- one float / vertex

3d surfaces

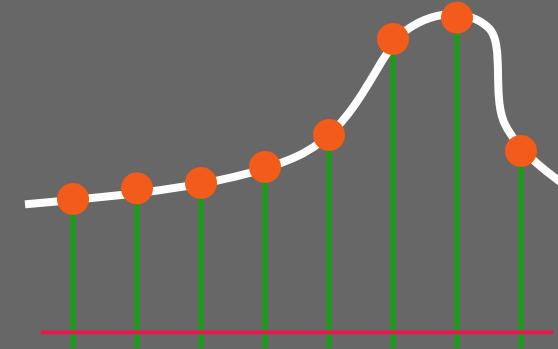

- $x(u,v), y(u,v), z(u,v)$
- three floats / vertex

Curves

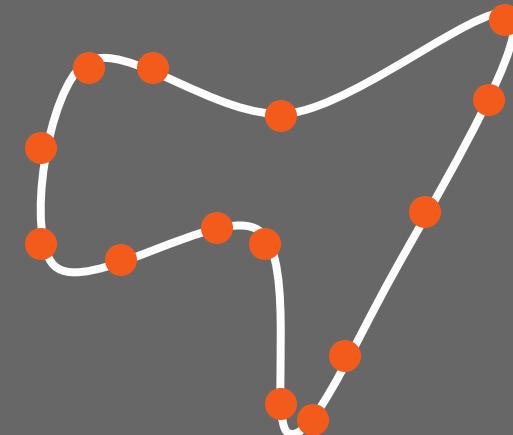

Function

- $f(u)$
- one float / vertex

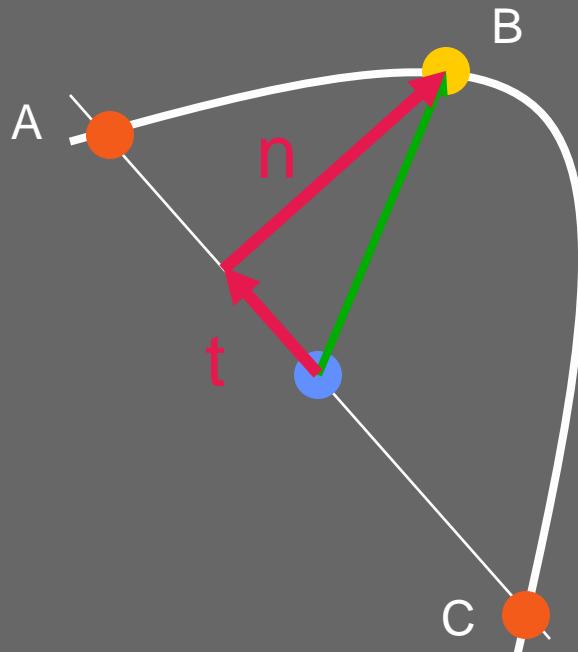

Curve

- $x(u), y(u)$
- two floats / vertex

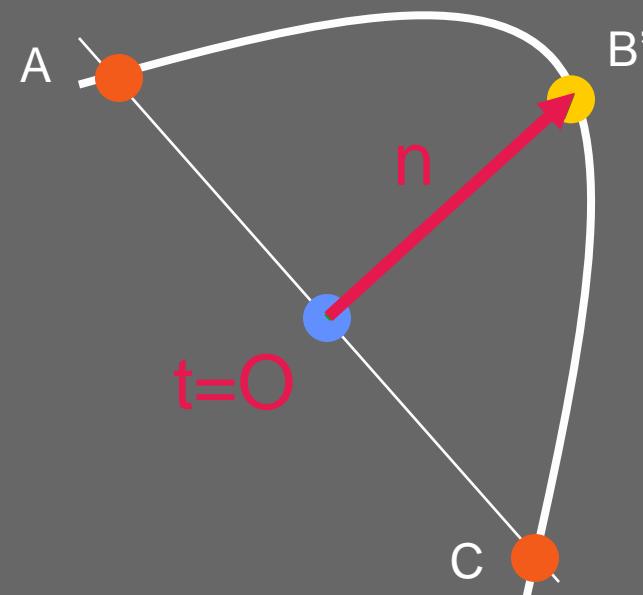

Local Detail (x, y)

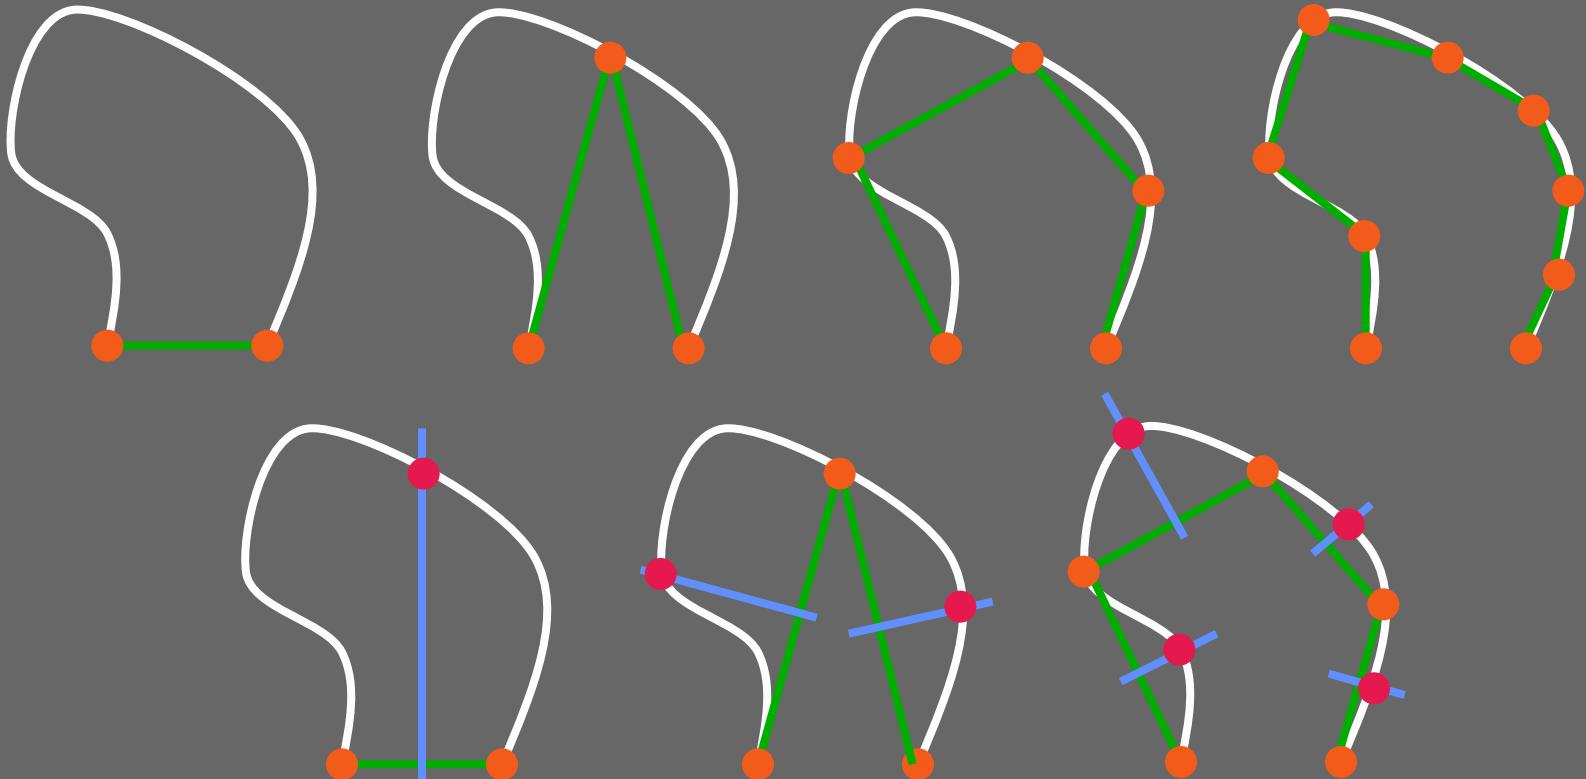

(t, n) stored

One float!

Simple Algorithm

Our Contribution

Normal meshes

- multiresolution
- geometry with one float per vertex

Conversion algorithm

- irregular to normal

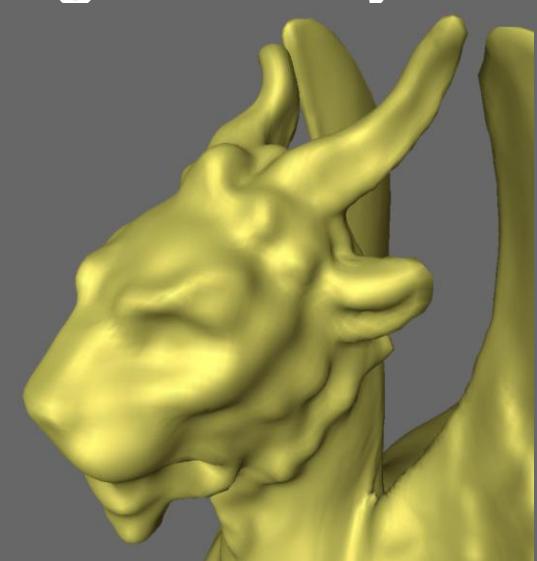

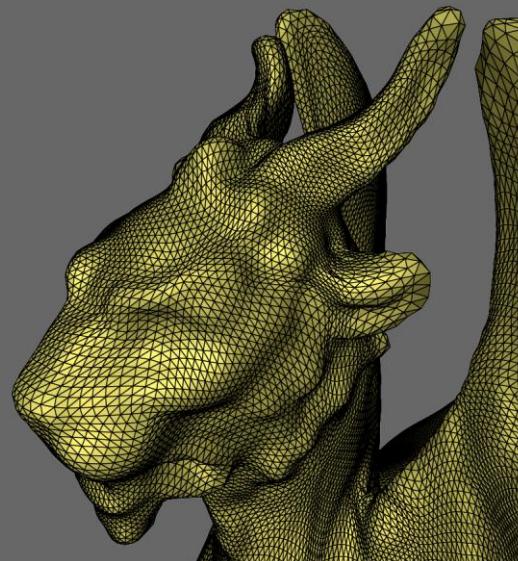

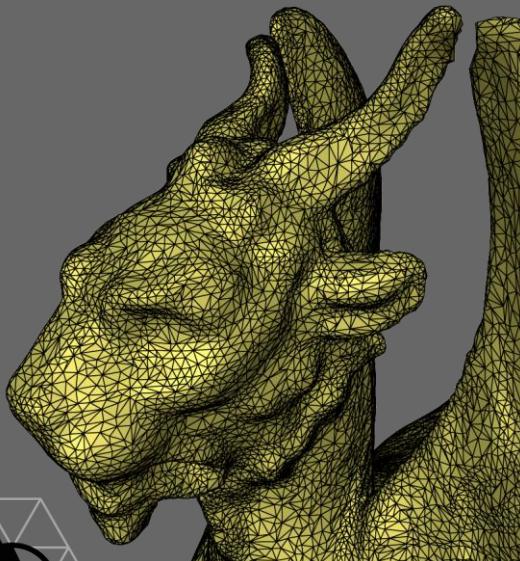

What is in a mesh?

Connectivity + Vertices

sample locations

geometry

Normal Meshes

Mesh

- geometry

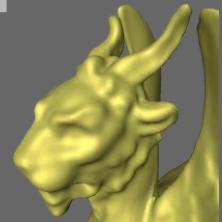

Normal mesh

- connectivity

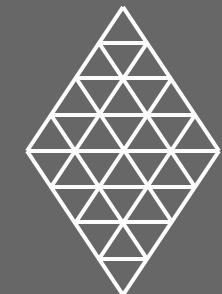

semi-regular

- sample locations

optimal
one float/vertex

Piercing

Storage

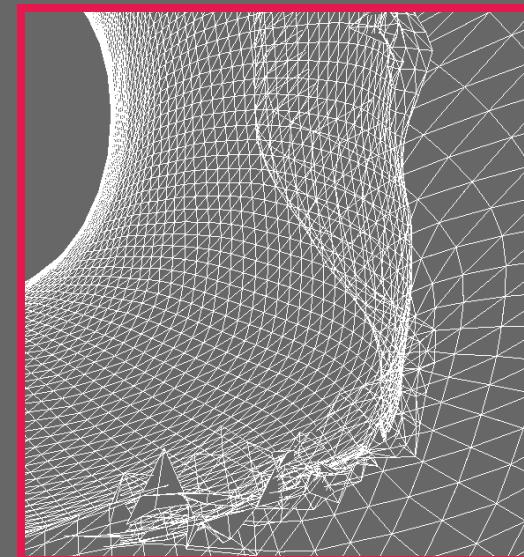

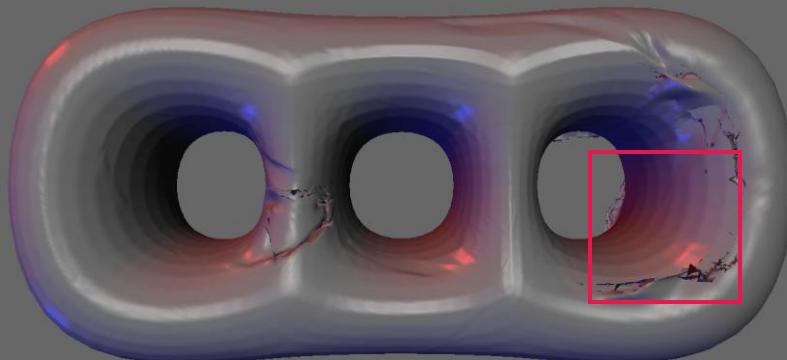

- one float/vertex

Naïve algorithm:

- start with coarse mesh
- pierce recursively

But ...

Naïve piercing does **not** work!

We need

- more control over the process

Algorithm

1. Initial patch layout

- progressive hierarchy
- global relaxation

2. Remeshing procedure

- piercing step
- one-to-one correspondence

Patch Layout

Base mesh

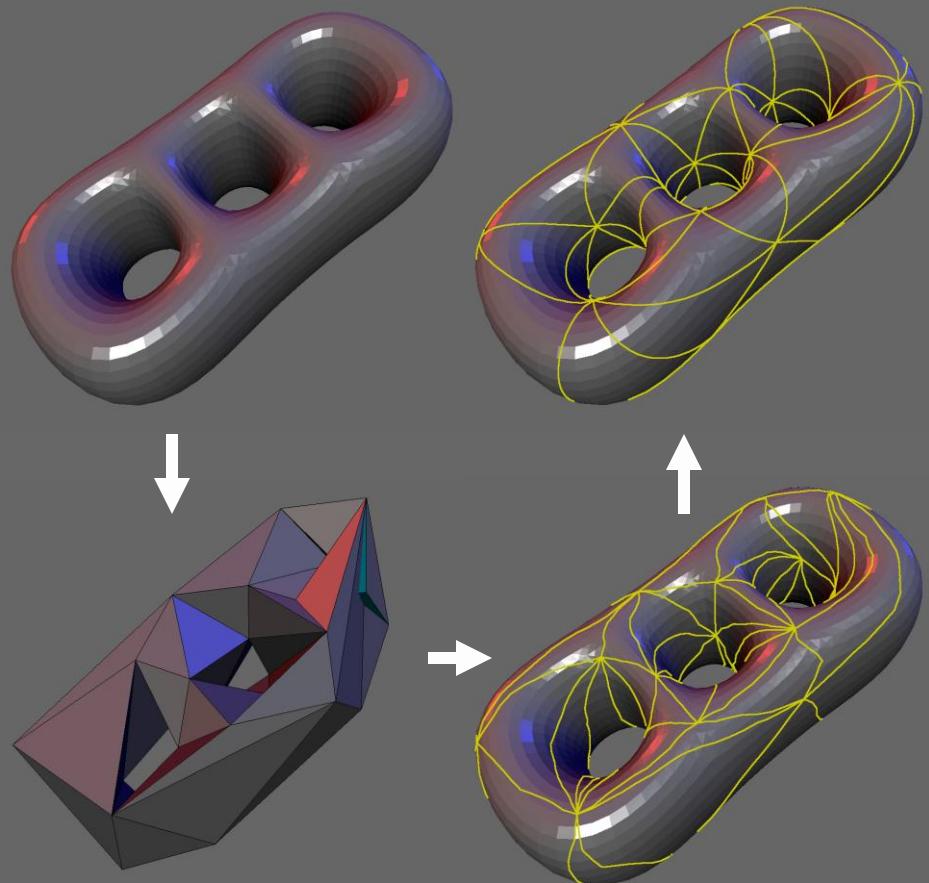

- simplification

Boundaries

- propagated

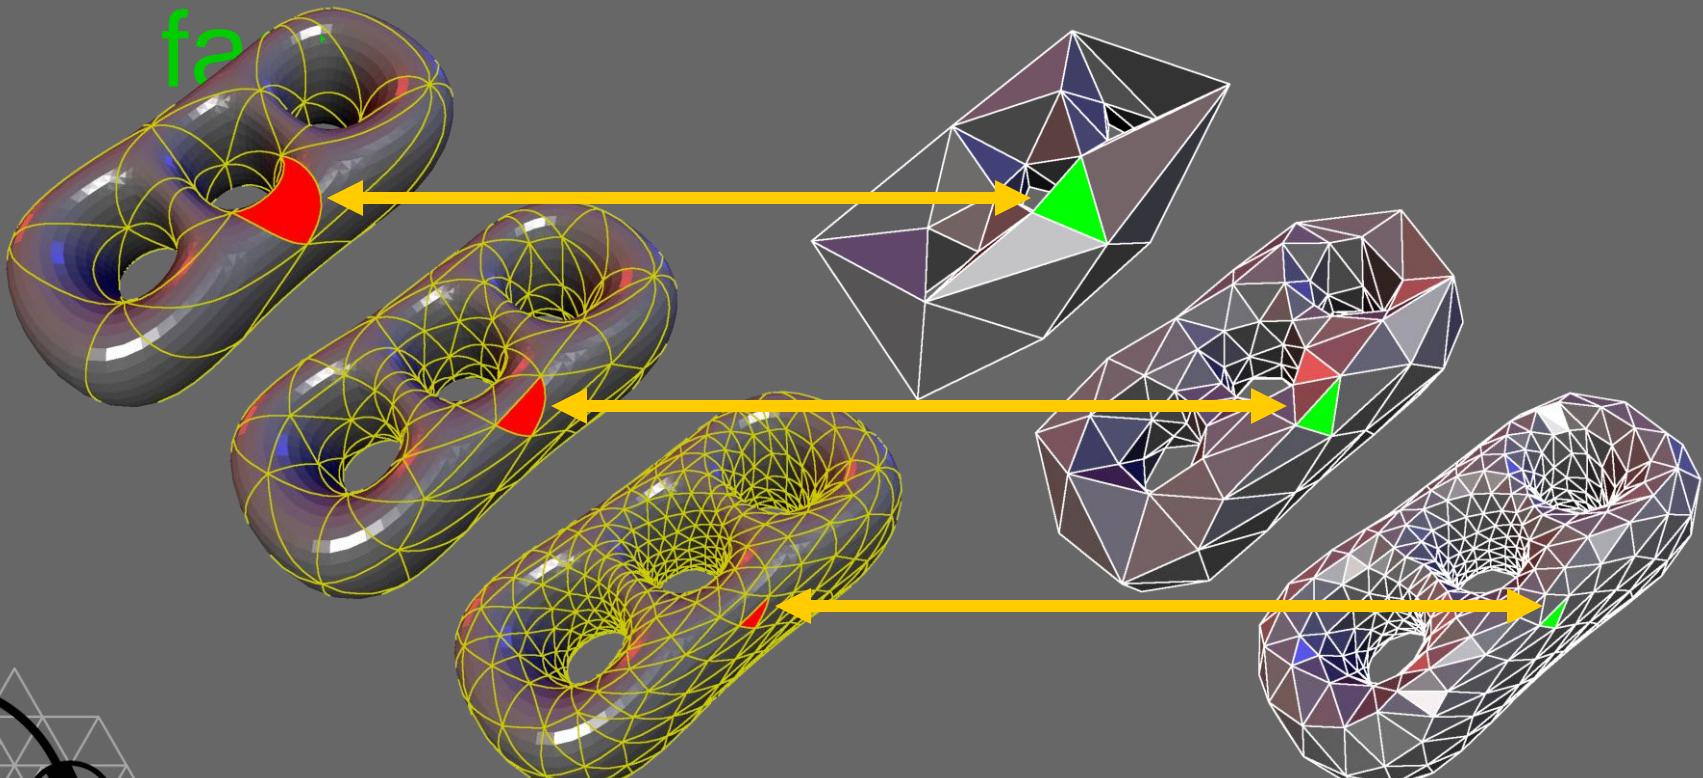

Global vertices

- relocated

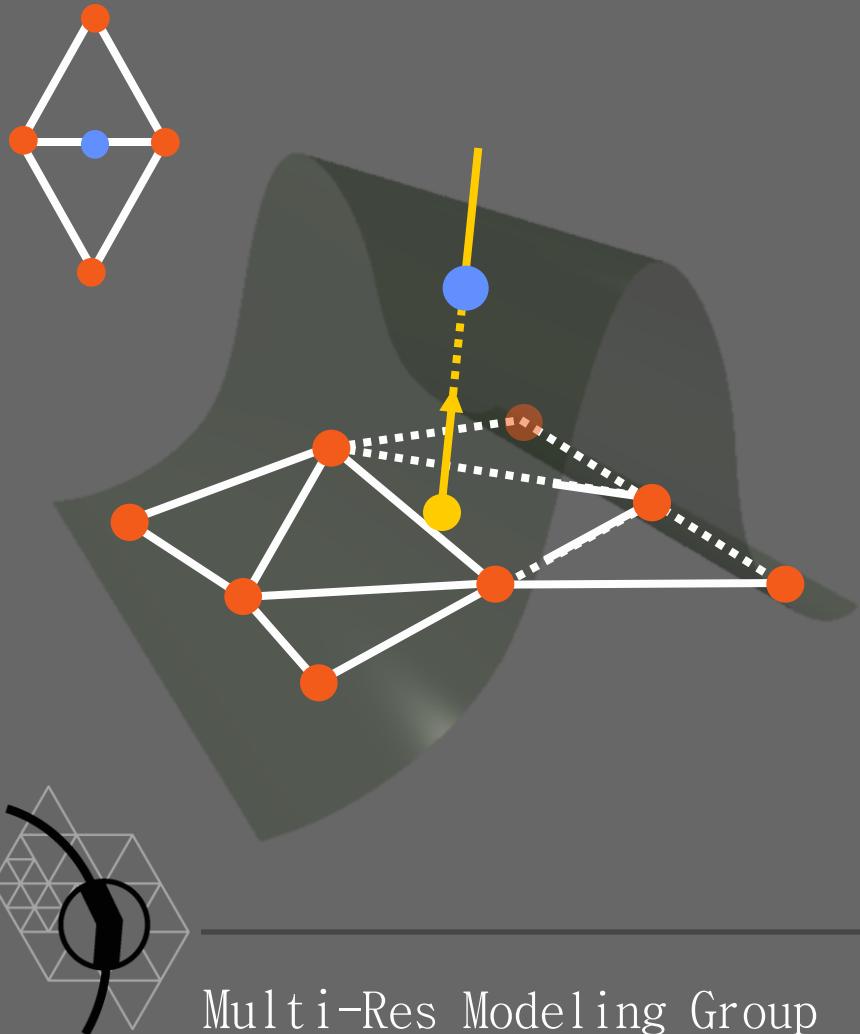

Remeshing Procedure

Correspondence: patches 

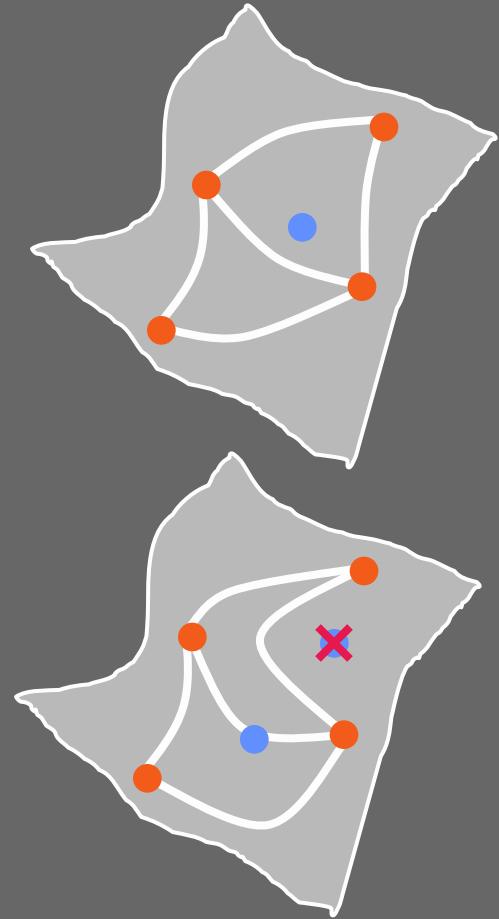

Piercing & Patches

Canonical:

Exception:

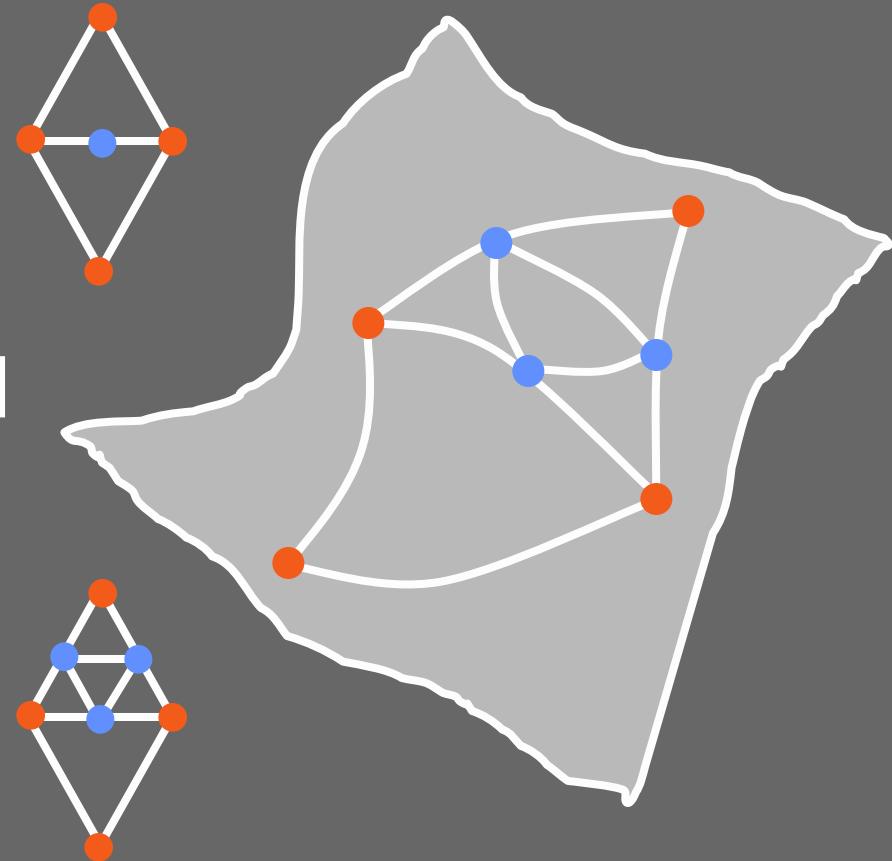

Maintenance

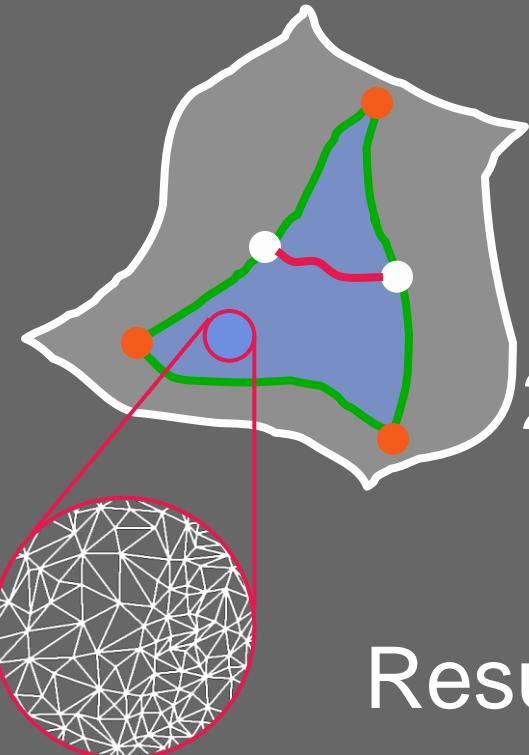

Operations

- new vertex
 - curve updated

- new edges
 - new curves

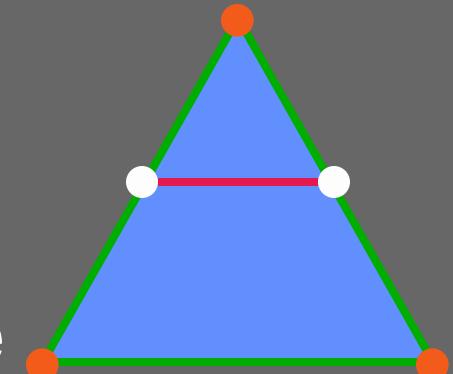

Drawing Curves

1. parameterize

2. draw in the plane

Result: curve on the original surface

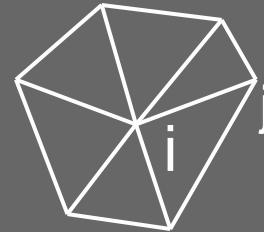

Parameterization

Floater '97

- linear system

$$\sum_j \alpha_{ij} u_j = u_i$$

- conjugate gradient solver
- good initial guess

Results

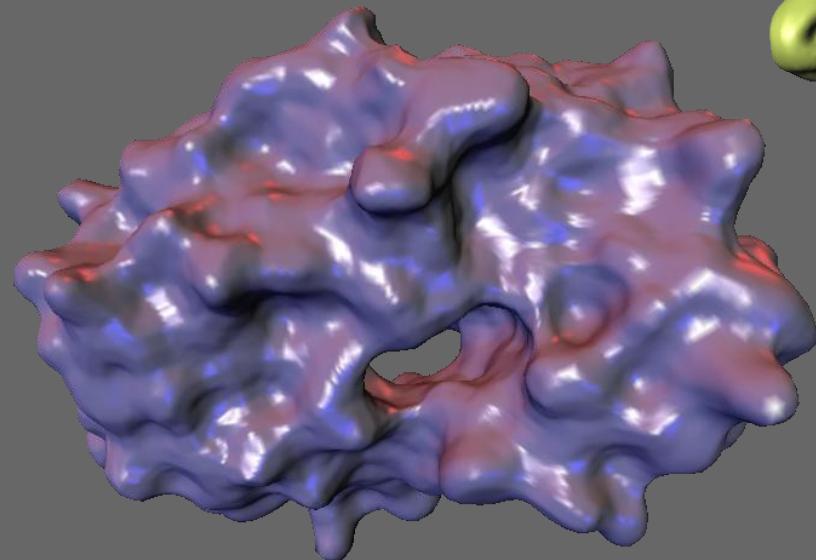

(mean-square) error = 0.0056%

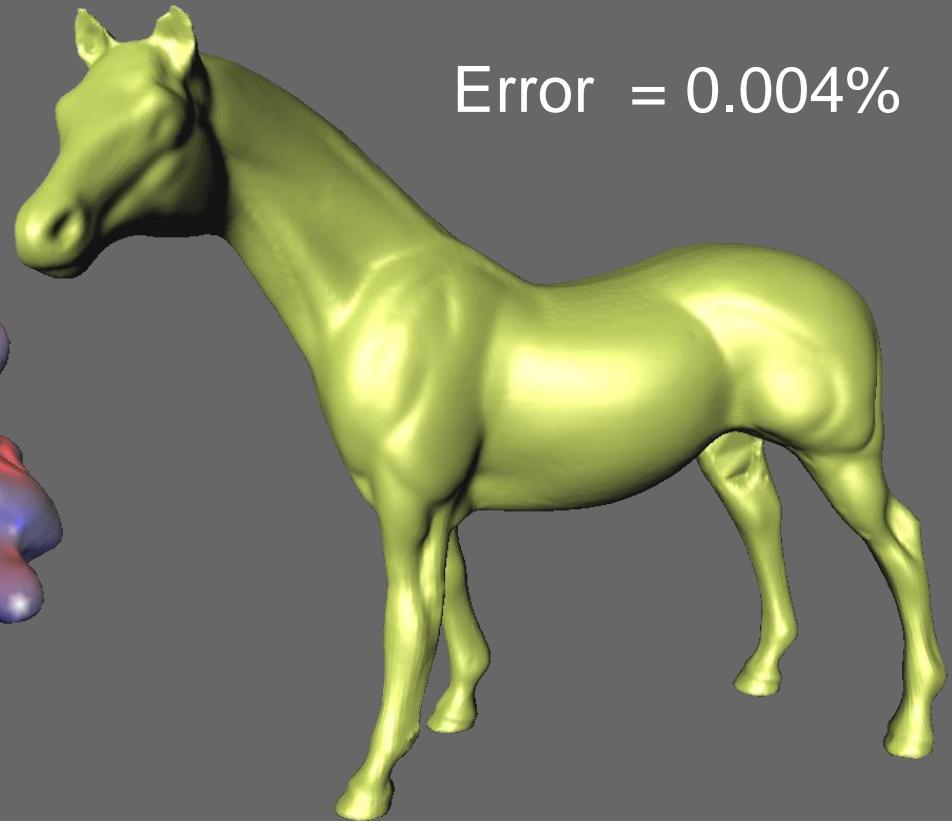

More Results

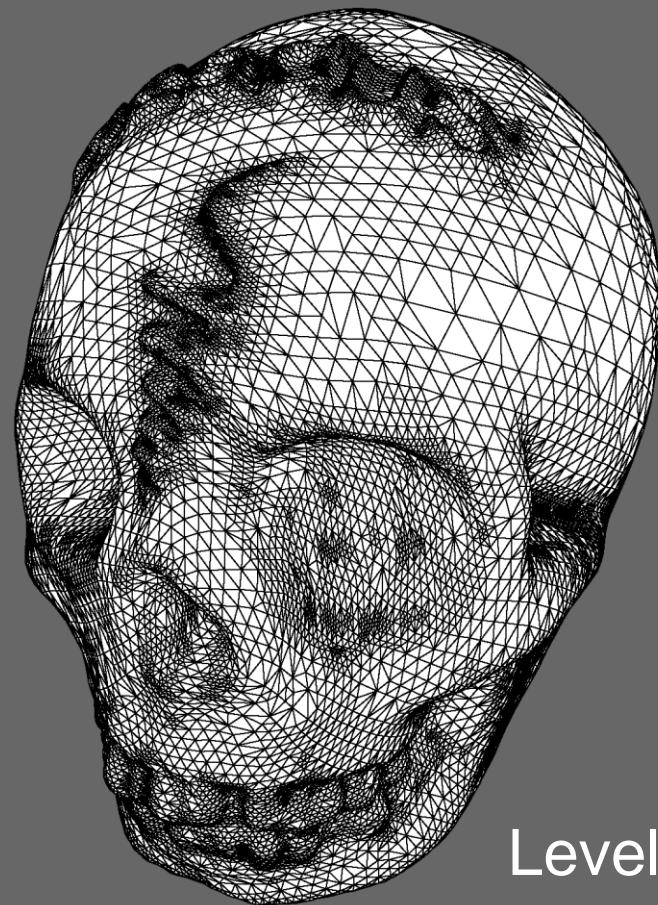

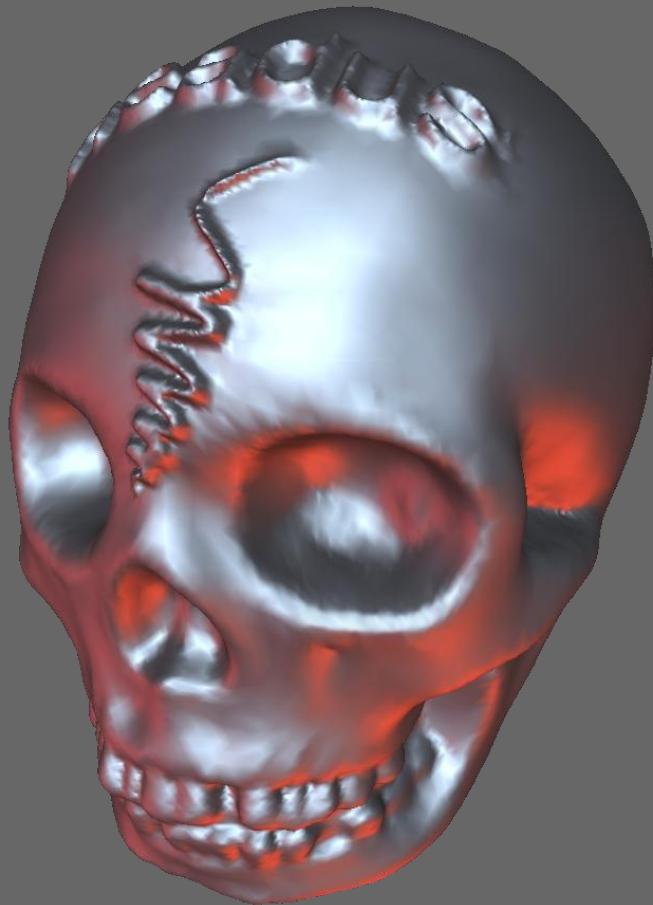

Error = 0.01%

Error = 0.004%

Adaptive Remeshing

Level 10

Multi-Res Modeling Group

Table

model	size	not norma	error	time
Feline	50,00 0	789	.015 %	5 min
Torus3	6,000	421	.03%	3 min
Skull	25,00 0	817	.02%	3 min
Horse	60,00 0	644	.004 %	7 min

Conclusions

Normal meshes

- remeshing procedure

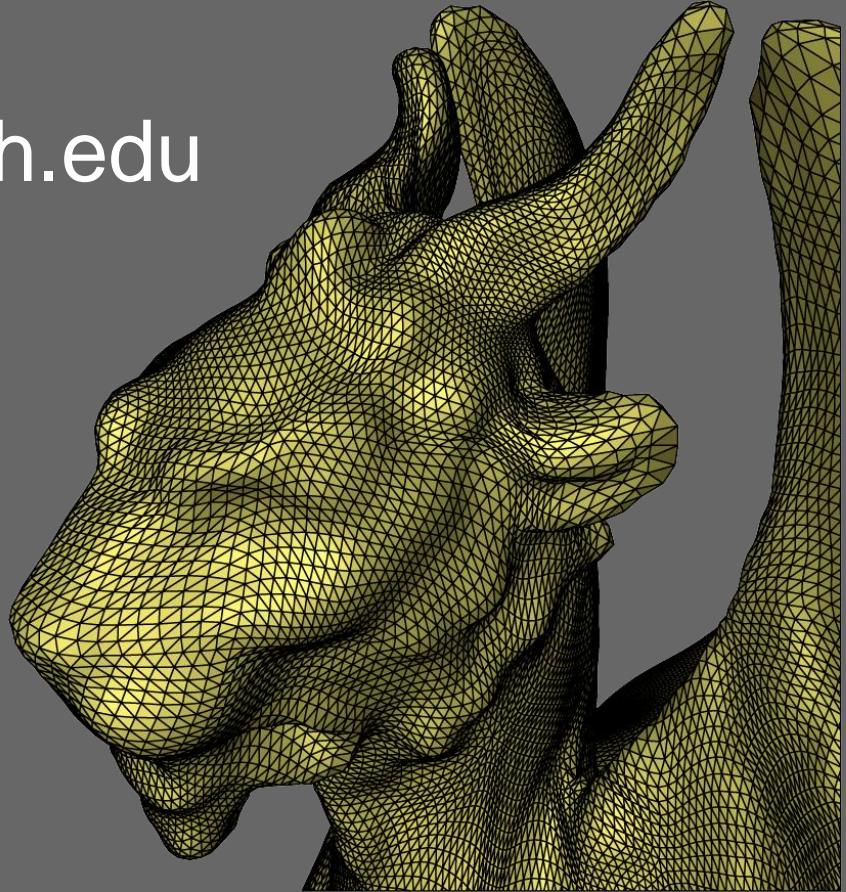

Future work

- approximating subdivision
 - Catmull-Clark, Loop
- applications of normal meshes
 - compression, processing

The End
